

## Breast Imaging Opportunity – Portland, Maine

Come enjoy the great quality of life that Maine has to offer! We are seeking a board-certified and fellowship-trained Breast Radiologist to join our thriving team of over 40 radiologists. Working in a state-of-the-art environment with 24/7 PACS configuration connectivity throughout multiple hospitals in Maine and New Hampshire, you will provide services in Southern Maine, particularly in Portland. You will be part of a large, subspecialty group with an emphasis on quality assurance which enables us to be a leader in patient care. Our breast imaging team includes several fellowship-trained physicians working in multiple breast centers, and performing US, tomosynthesis, MRI and biopsies, as well as serving as leaders in the breast centers and participating in tumor boards. This partnership-track opportunity includes a generous compensation and benefits package. There is an option to create a position focused strictly on breast imaging, with full-time and flexible part-time opportunities considered depending on the desired work/life balance. While not required, body imaging skills would be beneficial. Spectrum Healthcare Partners is a Maine-based, physician-owned and -led healthcare organization that combines strong physician leadership with expertise from a multidisciplinary management team. Spectrum is comprised of over 190 board-certified, primarily fellowship-trained physicians, serving patients and communities throughout Maine and northern New England. Our physicians are dedicated to excellence in the diagnosis, prevention and treatment of illness, to lifelong learning, to commitment to our communities, and to the primary importance of the care and treatment of our patients. Spectrum manages several subsidiaries, including real estate, imaging and management service companies which provide opportunities for investment and non-traditional sources of income.
