Toolmaker/Machinist for opportunity at exciting product development company.

GFE llc (est 1993) is located in Southern Maine and seeks skilled toolmakers for an exciting and challenging position. The role includes prototype mold and tool-making, fabrication, and opportunities for design support and contribution.

Responsibilities will include tight tolerance machining to support injection mold fabrication, fixturing, machined models, and component modification and fabrication.

Skills required include minimum two years (five preferred) in 3 axis CNC machining (4 axis is a plus), the ability to work within standard injection mold tolerances, and a general enthusiasm for working within a small skilled team to solve challenges in design and fabrication.

Additional value added skills include:

- Solid-works or Pro-E CAD
- NC-CAM and CNC programming
- Mold design and/or general familiarity with injection molding and plastics processing
- Microsoft Excel
- Testing and/or Quality

Benefits include;

- Competitive Salary
- Small family business and core team environment
- On-site training by senior toolmakers with a combined 90 years in tool and die experience
- Off-site training classes in modeling and NCCAM
- Vacation
- Holidays
- Full Employee Insurance coverage
